Skills

- Microsoft Azure | Terraform | AiX Unix | MS D365 LCS | MS D365 F&O | Linux, Windows, SQL Administration | Agentic AI | Agentic Workflow
- Azure DevOps | Azure & Infrastructure Automation | CI/CD | Python [Cloud Scripting] | YAML | CloudFormation | Incident response
- Kubernetes | ArgoCD | Helm | Prometheus | Grafana | Shell | English – All professional proficiency or above

Experience

Senior Site Reliability Engineer

Aptean Inc

Tamil Nadu, IN

11/2024 - Present

- **Pod Lead** overseeing operations and deployment activities for Pathfinder products (based out of UK) which includes: Calidus, Foodware, Swords, Axxos, Priam, Proteus, Unity F8, Gouldhall hosted on Aptean Data Centre and customers across globe.
- Lead **AI** and **Automation** team of 4, building AI agents on **Aptean Intelligence** to streamline workflow and reduce manual pre- and post-patching validation eliminating repetitive checks across applications- faster cycles, fewer human errors and Alert triage.
- Single point of contact during shift for cross-product issues — triage incoming tickets from consultants, PS, and product managers; assign ownership, set priority against active cases, and drive resolution within SLA. Without this coordination, tickets stall in the queue.
- Owned Ops, escalations & infra across the customer estate, SSL renewals on Apache/IIS (AIX/Windows), Failover and HA Activity
- Personally resolve issues end-to-end where possible, and guide stakeholders to the right team when not — keeping the operational flow moving across products and ensuring the team works on the highest-priority cases first.
- **D365 F&O** deployments via LCS for over **60+ customers**, QU/hotfix and ISV (AFB365) packages; Mobile QC, DB restore, Mobile Apps
- Leveraged prior DevOps Engineering background brought **Terraform**, **Jenkins**, and Azure Automate into Aptean TechOps from scratch -set up IaC, CI/CD pipelines, and workflow automation that the pod now runs on day-to-day.

Senior CloudOps Engineer

HCL Tech

05/2021 – 10/2024

- Led the design of multiple enterprise-level microservice applications of Commerce Experience Group, driving \$3.53 billion of revenue past year using the latest technologies like **Azure**, Cosmos DB, **Azure Functions**, **Key Vault**.
- Migrated and delivered **15+ On-Prem application** and Data platforms with effective strategies for migration from On-Prem as well other cloud vendors using Lift&Shift, Azure Migrate and managed On-Prem AD Servers through Azure Arc.
- Upgraded Terraform version from 12.8 to **13.1** and **Chef** versions from 15 to **17**. Prepared Runbook for new hires 1.0 to 1.5.
- Served as a **Code Approver** for a year reviewing, debugging Terraform, ARM Templates and Python scripts in GitHub.
- **Mentored** and coached four new Consultants, one Solution Architect, and a Penetration Tester, resulting in improved technical skills and increased team productivity by **200%** by being a part of Client's Engineering team and by working as the key member in building cloud infrastructure from scratch for the client **MRC Global**.
- Set up Jenkins server and build jobs to provide Continuous Automated builds based on polling the Git source control system during the day and periodically scheduled builds overnight to support development needs using Jenkins, Git, and Maven.
- Resolved chronic GitHub Linter Error by reconfiguring pipeline across 5 repositories; eliminated failure triggers and enhanced code quality, streamlining development workflows improving code quality for seamless development workflows by **50%**.
- Spun and managed servers through Azure Resource Manager Templates, **JSON** and worked on Azure VPN-Point to Site, Firewalls.

Cloud Engineer

12/2020 – 05/2021

- Maintained the integrity of over 5000+ Azure servers and attended P1 and other priority issues related to infrastructure with **zero escalations** at any time of the day for **Pepsico**.
- Deployed over 30+ Windows server, 50+ **Linux Server** and 10+ SQL Servers and 50+ Virtual Desktop, 25+ **Function Apps**, logic apps and Load Balancers in Azure with the mentioned specifications of various complications over a span of 6 months.
- Handled **JIRA** boards monitoring each sprint and completed all the **90+** pending **import task** during version upgrade.

Education

Bachelor of Engineering

PSNACET

Tamil Nadu, India

- Majored in Computer Science and Engineering

Certificates

- AZ-104 | AZ-305 | AZ-140 | AWS SAA C03 | AWS SAP C02
