Skills

- Microsoft Azure | Terraform | IBM AiX Unix | Dynamics Business Central| D365 LCS- F&O | Linux -Windows- SQL Administration | Agentic AI
- Azure DevOps | Agentic Workflows | Azure Infrastructure Automation | CI/CD | Python [Cloud Scripting] | YAML | CloudFormation | n8n
- Docker | Kubernetes| Jenkins & Ansible | ArgoCD | Helm | Prometheus | Grafana | Shell | English – *All professional proficiency or above*

Experience

Senior Site Reliability Engineer **Aptean Inc** *Tamil Nadu, IN* **11/2024 - Present**

- **Pod Lead** overseeing operations and deployment activities for **8** Pathfinder products (based out of UK) which include: Calidus, Foodware, Swords, Axxos, Priam, Proteus, Unity F8, Gouldhall hosted on Aptean Data Centre and customers across globe.
- Lead the AI and **Automation** team of 6, building AI agents on **Aptean Intelligence** to streamline workflow and reduce manual pre- and post-patching validation eliminating repetitive checks across applications ~ faster cycles, fewer human errors and Alert monitoring.
- **UK Shift owner for cross-product incidents** to triage and assign tickets from consultants, PS, and product teams; resolve end-to-end where possible or route to the right owner. Closed long-standing communication gaps with product managers and integrated ticket queues into Teams, eliminating pickup delays and ensuring SLA adherence across priorities. Owned Ops, Escalations & Infra planning across the customer estate, SSL renewals on Apache/IIS (AIX/Windows), Failover and HA Activities, Data Center maintenance.
- **Built multi-agent AI workflows on Aptean Intelligence** - uptime agent monitors customer sites every 5 minutes and hands off to a second agent that auto-restarts IIS on non-200 responses; a separate follow-up agent scans the DevOps queue daily and auto-emails tagged member for pending information, eliminating manual chase-ups.
- Engineered an end-to-end user lifecycle automation spanning a **Power Automate** intake form, approval routing and PowerShell remoting into DC servers to execute **Active Directory operations** ~ user creation, password reset, and unlock replacing a manual handoff with a single self-service workflow; **auto-healing** scripts that clear configured paths when server disk usage crosses 85%, preventing alert escalations to 0 and reducing the noise on Opsgenie for team's productivity.
- **D365 F&O** deployments via LCS for over **60+ customers**, 400 Dev/UAT machines ~ QU/hotfix and ISV (AFB365) packages; Mobile QC, Automated a 4TB DB restore from 66 hours to 18hours then shrunk it down to 2 hours to a completely end-to-end automated flow.
- Leveraged prior **DevOps** Engineering background brought **Terraform**, **Jenkins**, and Azure Automate into Aptean TechOps from scratch ~ setup IaC, CI/CD pipelines, and workflow automation that the pod that cut 2 day deployments to an hour, Auto Healing of server and triages.
- Led the ground up automation of IBM data Center and **migration** of multiple customers from multiple Data Centers to IBM Data Centers and Design committee member of Aptean Observe (home grown alert monitoring tool) and planned smooth migration from Zabbix & Dynatrace.

Senior CloudOps Engineer **HCL Tech** *Tamil Nadu, IN* **12/2022- 10/2024**

- Led the design of multiple enterprise-level microservice applications of Commerce Experience Group, driving $3.53 billion of revenue past year using the latest technologies like **Azure,** Cosmos DB**, Azure Functions**, **Key Vault.**
- Migrated and delivered **15+ On-Prem application** and Data platforms with effective strategies for migration from On-Prem as well other cloud vendors using Lift&Shift, Azure Migrate and managed On-Prem AD Servers through Azure Arc.
- Upgraded Terraform version from 12.8 to **13.1** and **Chef** versions from 15 to **17**. Prepared Runbook for new hires 1.0 to 1.5.
- Served as a **Code Approver** for a year reviewing, debugging **Terraform**, ARM Templates and Python scripts in GitHub.
- **Mentored** and coached four new Consultants, 1 Solution Architect, and a Penetration Tester, resulting in improved technical skills and increased team productivity by **200%** by being a part of Client's Engineering team and by working as the key member in building cloud infrastructure from scratch for the client **MRC Global.**
- Set up **Jenkins** server and build jobs to provide Continuous Automated builds based on polling the Git source control system during the day and periodically scheduled builds overnight to support development needs using Jenkins, Git, and Maven.
- Resolved chronic GitHub Linter Error by reconfiguring pipeline across **5** repositories; eliminated failure triggers and enhanced code quality, streamlining development workflows improving code quality for seamless development workflows by **50%.**

Cloud Engineer **HCL Tech** **12/2020 – 12/2022**

- Maintained the integrity of over 5000+ Azure servers and attended P1 and other priority issues related to infrastructure with **zero escalations** at any time of the day for **PepsiCo**.
- Deployed over 30+ Windows server, 50+ **Linux Server** and 10+ SQL Servers and 50+ Virtual Desktop, 25+ **Function Apps**, logic apps and Load Balancers in Azure with the mentioned specifications of various complications over a span of 6 months.
- Handled **JIRA** boards monitoring each sprint and completed all the **90+** pending **import task** during version upgrade.

Education

Bachelor of Engineering **PSNACET** *Tamil Nadu, India*

- Majored in Computer Science and Engineering

Certificates

- **AZ-104 | AZ-305 | AZ-140 | AZ-400 | AWS SAA C03 | AWS SAP C02**
