Skills

- Microsoft Azure | Terraform | IBM AiX Unix | Dynamics Business Central| D365 LCS- F&O | Linux -Windows- SQL Administration | IBM Cloud
- Azure DevOps | Agentic AI & Workflows | Azure Infrastructure Automation | CI/CD | Python, Shell, Bash Scripting | YAML | CloudFormation |JSON
- Docker | Kubernetes| Jenkins & Ansible | ArgoCD | Helm | Prometheus | Grafana | English – *All professional proficiency or above*

Experience

Senior Site Reliability Engineer — **Aptean Inc** — *Tamil Nadu, IN* — **11/2024 - Present**

- **Pod Lead** owning operations and deployment across **8 enterprise product** platforms over release, escalation, technical direction for the pod.
- Lead a 8-person AI and Automation team that replaced a 3-year manual patching validation process with AI agents, reducing validation from **2 days to a 2-minute** pipeline run across **1,500 servers**.
- UK shift owner for cross-product incidents raised by Professional Services, and customers. Owned escalations and infrastructure planning, quarterly SSL renewals across **600 customers** on Apache/IIS (AIX/Windows), failover and HA activities, and data centre maintenance;
- Built multi-agent **AI workflows** for uptime monitoring across **~500 customer** sites spanning 6 products, polling every 5 minutes and auto-restarting IIS on non-200 responses without human intervention.
- Engineered end to end user lifecycle **automation** handling **200+ requests weekly**, replacing a manual process with a Power Automate intake form, single click approval and PowerShell remoting into domain controllers to execute Active Directory operations including user creation, password reset, and unlock, replacing manual RDP with a single self-service workflow.
- Built an **AI driven infrastructure** provisioning pipeline using a custom **Claude CLI skill** that converts cloud requisition sheets into complete **Terraform** modules, pushing approved code to GitHub and triggering plan and apply in Terraform Cloud, delivering end to end.
- Chaired architecture and planning standups for the Aptean Observe rollout, tracking **design decisions** and **migration** progress across the programme. Defined the full alerting model for Aptean Observe, an in-house monitoring platform now live in production, specifying alert rules, severity tiers, and thresholds across servers, file systems, and services for every product in the pod, and migrated the entire pod estate from Zabbix and Dynatrace.
- Led ground up automation of IBM data centre build-out and migrated 20 customers from legacy data centres onto **IBM Cloud** infrastructure.
- Introduced **Jenkins** and Azure Automation into Aptean TechOps from scratch, establishing CI/CD pipelines and workflow automation that reduced deployment time from **2 days to 1 hour**.
- Built auto healing **MCP server** deployed across **5,000+ servers** spanning three pods, clearing configured paths when disk usage exceeds 85% and eliminating disk related alert escalations.
- Re-engineered **4TB database** refresh from a **66-hour** manual restore to a 30-minute automated flow with no manual intervention, replicating live UAT into a golden disk and attaching snapshots on demand supporting D365 F&O deployments via LCS for 60+ customers across **400 Dev/UAT** environments.

Senior CloudOps Engineer — **HCL Tech** — *Tamil Nadu, IN* — **12/2022- 10/2024**

- Led the design of multiple enterprise-level microservice applications of Commerce Experience Group, driving $3.53 billion of revenue past year using the latest technologies like **Azure,** Cosmos DB**, Azure Functions**, **Key Vault.**
- Migrated and delivered **15+ On-Prem application** and Data platforms with effective strategies for migration from On-Prem as well other cloud vendors using Lift&Shift, Azure Migrate and managed On-Prem AD Servers through Azure Arc.
- Upgraded Terraform version from 12.8 to **13.1** and **Chef** versions from 15 to **17**. Prepared Runbook for new hires 1.0 to 1.5.
- Served as a **Code Approver** for a year reviewing, debugging **Terraform**, ARM Templates and Python scripts in GitHub.
- **Mentored** and coached four new Consultants, 1 Solution Architect, and a Penetration Tester, resulting in improved technical skills and increased team productivity by **200%** by being a part of Client's Engineering team and by working as the key member in building cloud infrastructure from scratch for the client **MRC Global.**
- Set up **Jenkins** server and build jobs to provide Continuous Automated builds based on polling the Git source control system during the day and periodically scheduled builds overnight to support development needs using Jenkins, Git, and Maven.
- Resolved chronic GitHub Linter Error by reconfiguring pipeline across **5** repositories; eliminated failure triggers and enhanced code quality, streamlining development workflows improving code quality for seamless development workflows by **50%.**

Cloud Engineer — **HCL Tech** — **12/2020 – 12/2022**

- Maintained the integrity of over 5000+ Azure servers and attended P1 and other priority issues related to infrastructure with **zero escalations** at any time of the day for **PepsiCo**.
- Deployed over 30+ Windows server, 50+ **Linux Server** and 10+ SQL Servers and 50+ Virtual Desktop, 25+ **Function Apps**, logic apps and Load Balancers in Azure with the mentioned specifications of various complications over a span of 6 months.
- Handled **JIRA** boards monitoring each sprint and completed all the **90+** pending **import task** during version upgrade.

Education

Bachelor of Engineering — **PSNACET** — *Tamil Nadu, India*

- Majored in Computer Science and Engineering

Certificates

- **AZ-104 | AZ-305 | AZ-140 | AZ-400 | AWS SAA C03 | AWS SAP C02**
